DETAILED ACTION

1. The proposed new abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4) and thus has not been entered. A new abstract of the disclosure should be presented on a separate sheet, apart from any other text.

Claim Objections

2. Claim 17 objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The limitation recited in claim 17 appears to be fully present in claim 13 and thus it is not clear that claim 17 further limits claim 13.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 15, 16, 18 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 15, lines 3-4, "formed low temperature" does not read well.

In claim 16, line 4, "is difficult to flow" is indefinite.

In claim 21, lines 2-3, "consists (sic) of GaN" would seem to preclude the limitation set forth in lines 12-13 of claim 13.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nanishi et al teach a GaN-based device but does not suggest a buffer layer containing In, P or As.

Allowable Subject Matter

6. Claims 13, 14, 19 and 20 are allowed.
